PROJECTS

Personal Portfolio | *React, Node.js, HTML/CSS*
- A fully responsive personal portfolio website developed using React to showcase my projects, skills, and contact informations.

Secure Employee Management System | *HTML/CSS, Node.js, JavaScript and MSQL*
- This web application allows the user to view and manage all employee data, including adding new employees, updating data that is inconsistent, deleting employees, and searching for a specific employee. JWT authentication makes this safe.

Climate Data Visualizer | *Python, Plotly, Pandas, Dash, Node.js, APIs.*
- To raise awareness about climate change using interactive tools and motivate eco-friendly decisions.

Real Time Chat Application (QuickChat) | *Socket.io, Node.js, Express and HTML/CSS*
- QuickChat is a real-time chat application with emoji support using Socket.io, allowing users to join custom chat rooms and deployed the WebApp using Render and Netlify.

Online Voting System | *Python*
- A Command-Line Interface (CLI) based Online Voting System developed using Python. This project allows users to register, log in, cast their vote for political parties, and view real-time voting results. It ensures secure authentication and prevents duplicate voting.
