Abhishek Kumar Mishra

Data Analyst

Portfolio | LinkedIn | GitHub abhishekind711@gmail.com +91 6204957116 Hyderabad, India

OVERVIEW

MCA graduate with hands-on experience in data cleaning, exploratory analysis and dashboarding using SQL, Advanced Excel, Python (Pandas) and Power BI. Strong foundation in statistics from a Mathematics (Hons) background. Detail-oriented, double-check outputs for accuracy, and comfortable using AI tools to speed up analysis. Looking to grow as a Data Analyst.

EDUCATION

Master of Computer Applications | CGPA – 7.0 — **July 2026**
Chandigarh University — Mohali, Punjab, India

Bachelor of Science Honours (Mathematics) | CGPA – 7.43 — **August 2023**
Lalit Narayan Mithila University — Darbhanga, Bihar, India

Intermediate (CBSE) | CGPA – 7.0 — **July 2020**
Rose Public School — Darbhanga, Bihar, India

SKILLS SUMMARY

Tools & Technologies: SQL (Joins, Aggregations, Subqueries), Advanced Excel (VBA, Macros), Power BI, Python (Pandas, NumPy)

Data Analysis: Data Cleaning, Data Validation, EDA, Statistics (Correlation, Hypothesis Testing), KPI Tracking, Dashboards

AI Tools: ChatGPT, Claude, Copilot for query writing, debugging, analysis, and documentation

Core Skills: Analytical Thinking, Attention to Detail, Ownership, Problem-Solving, Communication

PROJECTS

Product Sales Analysis | Link — **Excel, Power BI**

- Cleaned and transformed sales data using Excel Power Query, handling data inconsistencies, and consolidated it using VLOOKUP and Pivot Tables for analysis.
- Analyzed **$119M** in total sales**, 1M** units sold**, $17M** total profit**, and 14%** profit margin across **2013–2014**.
- Developed an interactive Power BI report and dashboard to analyze segment-wise profit, product performance, country-wise distribution, and monthly profit trends.

E-Commerce Sales & Customer Analysis | Link — **SQL & Power BI**

- Imported and validated two related tables in SQL, checked data quality and duplicates, joined them on Order ID, and used aggregations, filtering and subqueries to prepare data for reporting.
- Analyzed **₹438K sales**, **₹37K profit, 6K units sold**, and **₹292 Average Order Value.**
- Built an interactive Power BI report to track customer, product, category, payment-mode, and state-wise trends, enabling data-driven decisions.

Netflix Content Analysis | Link — **Power BI, DAX & Python (Pandas, NumPy)**

- Analyzed **8,807** Netflix titles, including **6,131 movies** and **2,676 TV shows**, to identify content distribution, genre trends, ratings, and release patterns.
- Automated data cleaning in Python (Pandas) to handle missing values, duplicates and inconsistencies to prepare the data for better outcomes.
- Developed an interactive Power BI report and dashboard using DAX, analyzing content growth over time, country-wise distribution, top directors & actors, movie duration, and release trends, to present key content trends to stakeholders.
- Documented data definitions, assumptions and KPI logic in GitHub README for all three projects.
