OVERVIEW

Ambitious fresher with a strong interest in Data Analyst and related field. Capable of turning data into actionable insights to improve performance and efficiency. Looking for an opportunity to learn, innovate, and add value through data-driven solutions. Committed to continuous learning and staying updated with emerging data technologies and industry trends.

EDUCATION

Master of Computer Applications | CGPA – 6.8 (Up to 3rd Sem)

Chandigarh University

Expected May 2026

Mohali, Punjab, India

Bachelor of Science Honours (Mathematics) | CGPA - 7.43

Lalit Narayan Mithila University

August 2023

Darbhangha, Bihar, India

Intermediate (CBSE) | CGPA - 7.01

Rose Public School

July 2020

Darbhangha, Bihar, India

SKILLS SUMMARY

Data Analysis & Processing: Data Cleaning, Data Transformation, Data Interpretation, Basic Data Modeling

Tools & Technologies: Excel, Google Sheets, Power BI, Tableau, SQL, Python

Data Management & Reporting: Accurate Data Entry, Record Maintenance, Report Preparation, Dashboard Creation

Core Skills: Analytical Thinking, Problem-Solving, Communication, Team Collaboration

PROJECTS

Product Sales Data Analysis | [Link](#)

Excel, Power BI, Power Query & SQL

- Analyzed sales performance, profit trends, and regional distribution using Excel (Pivot Tables, Charts) to support business decision-making.
- Applied VLOOKUP and HLOOKUP to merge and analyze data from multiple sources for accurate reporting.
- Developed an interactive Power BI dashboard to track KPIs such as Total Sales, Profit, and Profit Margin.
- Created visualizations including line charts, bar charts, tree maps, and maps, and performed data cleaning using Power Query and DAX for accurate insights.

Netflix Content Analysis | [Link](#)

Excel, Python, Power BI & DAX

- Performed end-to-end Netflix content analysis using Python by cleaning and transforming raw data with Pandas (handling missing values, duplicates, and inconsistencies) to generate insights on genre trends, content growth, and regional distribution.
- Developed an interactive Power BI dashboard with DAX to present KPIs like content count, ratings breakdown, and year-wise trends for better decision-making.

House Price Prediction | [Link](#)

Python, Pandas & Scikit-learn

- Developed a Multiple Linear Regression model to predict house prices using features like carpet area and number of bathrooms, along with data preprocessing and train-test splitting (70:30) for reliable training.
- Evaluated model performance using R^2 score and validated predictions by comparing actual vs predicted values to ensure accuracy.

CERTIFICATIONS

- Master of Data Analysis with Python – Aug 2025 | [Udemy](#)
- Introduction to Data Analytics by IBM – Aug 2025 | [Coursera](#)
- Python Specialization by University of Michigan – July 2025 | [Coursera](#)
