OVERVIEW

Analytical and detail-oriented MCA graduate with a strong foundation in data analysis and business reporting. Capable of analyzing information, identifying meaningful trends, and translating data into actionable insights that support business decisions and operational efficiency. Strong problem-solving, communication, and collaboration skills with a continuous learning mindset.

EDUCATION

Master of Computer Applications | CGPA – 7.0
Chandigarh University

July 2026
Mohali, Punjab, India

Bachelor of Science Honours (Mathematics) | CGPA – 7.43
Lalit Narayan Mithila University

August 2023
Darbhanga, Bihar, India

Intermediate (CBSE) | CGPA – 7.0
Rose Public School

July 2020
Darbhanga, Bihar, India

SKILLS SUMMARY

Data Analysis & Processing:	Data Cleaning, Data Transformation, Data Interpretation, Basic Data Modeling
Tools & Technologies:	MS Office (Excel, PowerPoint), Power BI, SQL, Python
Data Management & Reporting:	MIS Reporting, Record Maintenance, Report Preparation, Dashboard Creation
Core Skills:	Analytical Thinking, Problem-Solving, Communication, Team Collaboration

PROJECTS

Product Sales Analysis	Excel, Power BI
- Cleaned and transformed sales data using Excel Power Query, handling data inconsistencies and preparing the dataset for analysis. - Analyzed \$119M in total sales, 1M units sold, \$17M total profit, and 14% profit margin across 2013–2014. - Developed an interactive Power BI dashboard to analyze segment-wise profit, product performance, country-wise distribution, and monthly profit trends.	
Netflix Content Analysis	Python, Power BI & DAX
Analyzed 8,807 Netflix titles, including 6,131 movies and 2,676 TV shows, to identify content distribution, genre trends, ratings, and release patterns. - Automated data cleaning and preprocessing using Python scripts, handling missing values, duplicates, and data inconsistencies to prepare the dataset for analysis. - Developed an interactive Power BI dashboard using DAX, analyzing content growth over time, country-wise distribution, top directors/actors, movie duration, and content release trends.	
E-Commerce Sales & Customer Analysis	Excel, SQL & Power BI
- Performed end-to-end data analysis using SQL and Excel, including data cleaning, transformation, validation, Lookup functions, Pivot Tables, and Pivot Charts to analyze sales data. - Analyzed ₹438K sales, ₹37K profit, 6K units sold, and ₹876 Average Order Value, and developed an interactive Power BI dashboard to identify customer, product, category, payment-mode, and state-wise trends.
